Welcome to the G2E 2009 edition of The Inside Straight™

Your shortcut to a productive time in the video poker booth

The Inside Straight™ is designed to showcase our great new video poker games and the many ways we can help you increase video poker revenues and also take care of your bottom line.

One big way to get bang for your buck is to take advantage of our show special. Representing a value of over \$7,000, the IGT Video Poker Show Special is back by popular demand. During this promotion, you will get a FREE new daily fee game for every four you buy. That's five games for the price of 4 with NO daily fees for 60 days. The offer is limited to orders placed by 12/18/09 and is available to all customers – not just those attending G2E in Las Vegas.

Our creative video poker partners at VideoPoker.com will translate the purchase value of a daily fee game into entertainment value for your players by providing a free, playable version of the game by VideoPoker.com for you to share with your customers online. Your video poker players will be excited to try the game at home and will visit your property with great anticipation when the game is installed. Please see page 3 for more details.

IGT's Video Poker Department takes great pride in knowing you and your video poker customers. Our long-standing goal is to provide the best value for your investment in our products. We develop games that are designed to keep your floors stocked with video poker themes that will bring entertainment and satisfaction to your players, and real value and consistency to your bottom line. And because we believe an informed buying decision is crucial, we've worked closely with VideoPoker.com to create the opportunity for you to test drive our new daily fee games. You wouldn't buy a car off a brochure, why buy a game before you've tried it? Visit www.VideoPoker.com/Try to experience the difference.

A lot of planning went into this year's crop of games. We can't wait to show you how we've taken video poker to the next level ... for you and your players.

Sincerely,

John Daley

Make informed buying decisions and drive real play with VideoPoker.com

By Mike Fields

Try before you buy

We've partnered with IGT to create the "Try Before You Buy" promotion. Now you can play free versions of games before you place an order at the only online site to feature real IGT daily fee video poker games: www.VideoPoker.com/Try. This site even features popular recent releases like Good Times Pay Poker™, Big Times Draw Poker®, Quick Quads Poker® and Ultimate X Poker™.

Drive traffic

Your players can also try it before they play it in your casino. We can provide you with playable versions of the new games you decide to buy for your players to play online at home – giving them a great new reason to visit your web site and property. During this promotion, we will provide you with a free, playable version of your recently purchased video poker games to offer to your players' club members. We will customize the online game with the specific game families and paytables you

pick, giving your players the true look and feel of your new game. Your video poker players will love the opportunity to learn and play for free online and will thank you with a visit to your floor to play the real thing.

Our web designers at VideoPoker.com will build, host and maintain the game web page to look and feel exactly like your web site. Your customers will have no doubt where they are when they take advantage of this exciting free game play. We provide a dynamic link to the game page for use on your web site and in e-mail communications, so no file downloads are needed. And because visitors will be spending an extended amount of time on your game web page, we can add other promotional offers or art elements of your choice.

Recent promotions we've done with casinos have shown us players are enthusiastic and responsive to e-mail and links on sites promoting new features.

Chances are high people will visit your page and interact with your brand long after the initial promotion. You'll know first-hand how your customers are responding because we will send you reports and statistics highlighting web site traffic and behavior on your game page.

Start today ... it works

Qualifying for this special, no-cost promotion is easy; visit www.VideoPoker.com/Try today. If you see a game you like, contact your IGT Video Poker Account Manager or Product Specialist to place an order. It all starts with your purchase of an Action Gaming® video poker game. Upon installation, tell us how you want the online game to be configured and we will create your game page. Then drive traffic to your site with an e-mail to your players' club members announcing this special page. For more information, please contact me at Mike.Fields@ActionGaming.com.

Super Times Pay® Poker is one of the most successful video poker games in recent years, and the first incremental betting game overwhelmingly accepted by video poker players. Now for a 7th credit buy-in, players are rewarded with literally double the excitement of the original game: a second multiplier on the draw. If the game awards multipliers on both the deal and the draw, they are combined – up to a whopping 20X – and applied to any win.

Players already understand and enjoy the game strategy and seek the excitement of the randomly appearing multiplier – hoping for a 10X. Double Super Times Pay Poker™ is a high-octane variation on this known game strategy with twice the multiplier frequency (one every 8 hands, on average) resulting in higher awards and satisfied patrons.

Five Star Poker™ is a compilation of successful multi-hand games now available for the first time as single-hand themes. This suite brings popular and proven games to a new video poker playing audience – players who appreciate the entertainment value of more time on the machine for their gaming dollars. These exciting games with lower wagers (minimum wager of 6 credits rather than 18) represent an easy and economical way to introduce new games. Many will even want more action and decide to play the multi-hand games.

IGT Video Poker's new lower daily-fee price point per game brings economical value to you, too.

Powerhouse games get a refresher

Fifty Play Draw Poker™ and Hundred Play Draw Poker™ now enhanced with new features

It's hard to improve on an original, especially when it has maintained popularity in the field for more than eight years. However, we've found just the right features to bring a meaningful refresh to our ultimate multi-hand games – Fifty Play Draw Poker™ and Hundred Play Draw Poker™ – with Quick Quads Poker® and Super Times Pay®. Not only will these two game play options create dynamic new versions of the existing games, both features are already proven and accepted by players in the field. We've built sustainability right into the package.

Adding enhancements like these bridges the gap between new game challenges and the consistent gaming experience players have come to

know and love. We know this formula is particularly critical to the video poker niche. The IGT Video Poker design team has created the most exciting versions of refreshed classics to date. One set represents a hybrid of fast-paced, multi-hand action and double the number of 4-of-a-kinds courtesy of the Quick Quads Poker® feature. The other set brings the powerful profitability of the frequent 2X-10X multipliers of Super Times Pay® Poker to the highest number of multi-hands possible.

We've even figured out a way for you to offer these new games to your players without abandoning the successful originals. With four separate chips containing the original multi-hand game and one hybrid, players

can try a new theme, stick with the original version or enjoy playing both on one box. Two chip configurations for each multi-hand will be available. For example: chip one will contain Fifty Play Draw Poker™ and Fifty Play Draw Poker™ with Quick Quads Poker®, and chip two will feature Fifty Play Draw Poker™ and Fifty Play Draw Poker™ with Super Times Pay®. The same packages will be available for Hundred Play Draw Poker™.

The expanding market of casual players will be attracted to the exciting volatility of amped up multi-hand action. And veteran players will be thrilled with new games to play on favorite multi-hand game formats. The renewed levels of activity on your floor will show it.

Super Star Poker™ provides the broadest variety of games players have ever seen and is specifically designed for bars, taverns and high-limit areas. The suite combines top multi- and single-hand video poker, keno and blackjack games, and is the much-anticipated debut of video slot giants Coyote Moon® and Wolf Run® in a game package. Super Star Poker™ soundly solves the challenge of too few machines with not enough game play options. With so many choices available on multiple machines, patrons will never have to wait to play their favorite games again – increasing player loyalty and revenues for properties that take advantage of the Super Star Poker™ package.

Knowing that price-per-machine is one of the reasons operators are not able to offer more of these games in their bars, we've developed a unique site license pricing model – based on the number of programs installed.

White Hot Aces

Revved up with the first real community bonus for video poker, Hot Pursuit Poker™ is based on the wildly popular Triple Play™ and Five Play® Poker games. Specifically designed to take full advantage of the widescreen format on G20 machines, players are entertained with the sights and sounds of racetrack action while playing for “trips.” Each one of these 3-of-a-kinds, or “trips,” dealt in the base game qualifies the player for a lap in the bonus round. The first player to accumulate three dealt trips (or laps) initiates the bonus for everyone. With this true, multi-player, community bonusing experience, everyone will be excited to see who can initiate the bonus first and celebrate the experience together.

The Racing for Trips™ bonus is based on popular Spin Poker™ game play. It is displayed on an impressive 70" overhead display, sharing the excitement of the bonus game with all players and attracting the casual passerby. During the qualifying base game, each player with a dealt trip is awarded a lap. Progress is designated by moving their assigned car on the

overhead “leaderboard” to the Lap 1, Lap 2 or Lap 3 category. The anticipation builds as track sound effects alert the entire community who is qualifying and with how many laps. Everyone will want to get to the checkered finish line first!

The initiating player spins the cards to reveal the start of three premium hands – one each on a horizontal payline. Players with one 3-of-a-kind get to play the bottom payline. Players with two 3-of-a-kinds get to play the bottom and middle paylines. The player who triggers the bonus game gets to play all three paylines. Once the draw is complete, the results display, the players are awarded according to the bonus payable, and base game play continues until the next race begins.

Video poker players love chasing progressives. But with traditional progressives, there can be only one winner. Hot Pursuit Poker™ lets everyone have a chance to qualify for and participate in the bonus. Since every player in the bonus is a winner, this buy-a-pay bonus delivers obvious value.

Video poker delivers Mega money

'Super times' guaranteed with first wide area progressive

IGT is delivering a dose of jackpot fever to players like never before. Player-proven Super Times Pay® Poker makes its debut as the first wide area Mega Progressive poker game. Previously, poker jackpots were limited to standalone progressives. This game gives video poker players a chance at big jackpots including a chance of winning a million dollars or more. The jackpot is triggered by the first 10X Royal Flush win in any game with max credits bet. Played on the Triple Play™ multi-hand format in both quarter and dollar denominations, the progressive amounts start at \$50,000 and \$200,000 respectively.

IGT's successful existing wide area progressive infrastructure means we have the history and credibility to provide what no other manufacturer can. The chance of winning a big jackpot brings players in, and it's what keeps them coming back. The Super Times Pay Mega Progressive™ offers yet another chance for players to win big, and for you to benefit from their excitement and increased machine play. And with more than \$5 billion paid out in jackpots since the first Megabucks® system was introduced in 1986, players have a lot to get excited about.

Your video poker patrons will readily calculate the value of qualifying for a meaningful jackpot by increasing coin in. In fact, Super Times Pay® Poker is already a successful incremental betting game – the first ever to be accepted by video poker players. And the game continues to be in demand with multipliers from 2X to 10X appearing approximately every 15 hands on average. Players love the chance to multiply winnings and adding a minimum jackpot of \$50,000 guarantees this will be a high-profile game on any floor. "Super Times Pay® Poker is the most popular game we've invented in many years. Blending this really exciting and fun game with a big jackpot is a no brainer," Mike Fields, executive vice president of Action Gaming/VideoPoker.com said.

This game combination has broad appeal for any progressive player. The opportunity to win a significant award will not be lost on savvy video poker players while slot aficionados reminded of MegaJackpots® success stories will also be drawn to the familiarity of a big jackpot.

Triple Double Bonus Poker™

This fun variation of the popular 7-card stud game, 10 Hand 7 Card Stud Poker™ gives players ten hands to play the same seven cards to make the best hand. Ten cards are dealt face-up. The player must choose to discard three. The game randomly selects five of the remaining seven cards and places them into each of the ten hands. A 'near miss' Royal Flush award of 20X the bet is given if the seven cards selected by the player include a Royal Flush but the final evaluation does not include a Royal Flush. The bet is refunded if no win is possible with the ten original cards.

With more than 420 units in the field, over 50 pending orders, and averaging more than twice the win per unit of typical video poker games at most locations, Ultimate X Poker™ is the newest video poker success thrilling players everywhere. It's a completely new type of theme that offers the potential for more wins than any other multi-hand poker game on the floor. A bonus multiplier – up to a whopping 12X – is awarded to each active hand ending in a winning combination. The value of the multiplier is applied to any wins received in that hand during the next game. Each successive hand is almost guaranteed to be more exciting than the last. It's better than a crystal ball and players respond by staying in their seats to see what big wins are coming their way.

You vs. "The Brain"

New G2 poker game entertains wide variety of players

Betting on the popularity of one of the world's most successful live table games, G2 Game Design is crossing the excitement of Texas Hold'em over into a new slot machine format. Texas Hold'em Heads Up Poker™ is the first game to use neural net technology, a mathematical model that simulates the operation of the human brain. Players will no longer be playing against the house or payable, they will be playing against an opponent like no other – a computer program developed to be a dynamic decision-making engine. This intriguing and groundbreaking game is sure to attract and entertain all types of gaming enthusiasts.

"Texas Hold'em is the most popular card game in the world, now available on a slot machine, with no rake and no payable," Gregg Giuffria, CEO of G2 Game Design said. "Texas Hold'em Heads Up Poker™ is the first in the history of gaming to use an artificial intelligence-trained neural net. Players will be stunned by the quantum leap in technology introduced by IGT and G2 Game Design."

The program plays according to standard rules of the game but has the ability to interact with its opponent to apply those rules. Decisions are made

based on the current game state, but unlike a live opponent, it does not "learn" a player's strategy. Less-experienced players can expect stronger results because the computer program will not hone in on any weaknesses. This is an ideal scenario as players attracted to this less-intimidating version of a live table game will most likely be novices.

Stunning graphics create an engaging table experience with raucous card shuffling and clinking chips. Tiny details such as an effervescent beverage and a smoldering stogie complete a fascinating backdrop to all the card action. Meanwhile, decisions are only made after a slight pause while a "THINKING" message flashes above the opponent hand. This is a clever way to remind the player that this game is like no other.

A side bonus bet enters the player into either a Multi-Hit Stud game or Bad Beat Jackpot. Playing out on the top box, these side bets create the opportunity to win additional pays while churning the action. All kinds of players will ante up for this new brand of poker game play.
